One of best locos in the TS

An icon for DB passenger service

Sound: Windblowers, Traction motors, horn, not the rubbish recycle sound, but the exactly the replica of the real 101, like the videos on youtube.

Performance: Extremely Good

Supercar like acceleration depressive speed even with 16 Mk3a SLEP or 14 Avms coach just using 150kN half of the full power.

Outlooking: Simple but catchy, especially the sloped face and the skirt panel, ensure aerodynamic. I'd Still Smash fam I mean Adam doesn't know what he's missing. I was interested by the bad reviews, so I tried this one out and liked it a good bit. You have to build buildings around a hotel that your co-owner and mafia jerk is trying to destroy for insurance money. It's basically tower defense, but it has some nice variety with very level changing the formula a bit to keep things fresh. It's pretty hard, too. For five bucks, it's a pretty neat little thing if you don't mind more repetitive stuff.. -I am going to be plain. This is a book. A book with choices in it that draw you into the story and lore of the world more so than a normal book.

-So yes...I do recommend this. I loved the story because I felt like I was that Dragoon officer. They don't exaggerate the whole "VAST UNSTOPPABLE POWER! OF YOUR IMAGINATION" thing.

-This is a great story to get sucked into.

-10/10! Books are cool again!. I'm not saying the game is overpriced, but I don't think it's worth your time. There are hundreds or maybe thousands of free browser puzzlers (or cheap ones on Steam) that have way more meat and better QoL.

Design:

- It's a very, very straightforward game. Almost all of the challenge here comes from speed/execution, not the puzzles. I beat all 40 levels in 20 minutes.

- In AT LEAST a third of the levels, you can straight-up ignore 50%-80% of the elements. I can sort of see how the developer intended these levels to work, but for any level that has more than like 10 things on the screen, there are obvious paths that let you skip a lot of it.

QoL:

- Rotation is backwards!! Right should move all the notches clockwise, and left should move them counterclockwise. I don't know, none of the other reviews mention this so maybe I'm just crazy, but I feel like it's objectively wrong. If you die to this in regular play it's not a big deal, but in One Chance mode I ended up checking which way I needed to rotate before every "throw". Even after 90+ minutes of playing my "instinct" was to rotate the wrong way (the way that makes sense). The "right=clockwise" thing is just so ingrained in me from other games that use rotation. Even if you flip the controls in the box that comes up before the game launches, it doesn't actually change in-game.

- You can't see if the ball's about to throw left or right. I can see the argument that this makes the game a bit harder, but I don't think the loss of clarity is worth it. Edit: Actually, you can. In the top-right there are 4 arrows that show the possible throw directions. I was thinking more like having 2 arrows on the ball, but I guess this works.

- The default color scheme is pretty garish, and Night Mode doesn't persist (so you need to re-toggle every time you enter the game). But at least Night Mode is beautiful. Definitely play with that on.

- The positioning of some of the elements is weird (it's not on a grid like you might expect). Sometimes it's not easy to see if the ball is going to collide with a big circle (you die if this happens) so it's not immediately clear if some solutions are possible. Also some of the "WinBoxes" aren't centered on the ball, doesn't affect anything but it does annoy me a little bit lol

It took me 20 minutes to beat the initial game. One Chance mode took a bit under 2 hours, but admittedly I was playing pretty badly. If you're on the ball there's probably 90 minutes of total content in rot. Like I said, it's a fair asking price but eh, there were better uses of my time.

Oh, and heads up: one of the other reviews mentions that One Chance mode is "roguelike" and I just want to say this is definitely not the case. Part of the reason I bought this is because I thought One Chance had randomly generated levels, but what

it actually is is the first 30 levels back-to-back, if you die you start over. It's not really close to "roguelike" or even "roguelite". This isn't the developer's fault ofc, just clarifying. Awesome Game. Perfect for a quick blast before breakfast!! Cheap at twice the price!!. I have many hours played in the board-game and this is a pretty faithful adaption. It's a great solitaire board-game that translates well to the PC. There's a few things I wish it would do (e.g., keep the virus and store tabs open by default), but overall it plays really well. No crashes either.. If you enjoy strategy games that pose varying levels of difficulty (if sentinels are involved then it gets a lot tougher) then this may be a game for you. Personally, the custom character creation is my favourite part of game. Then comes the fact that every level you encounter has a COMPLETELY different layout, unknowing of what may lay behind every door and if the decision to open a door or blast open a door may:

1. Get your Deadnaut 'decapitated' by a sentinel.
2. Get your Deadnaut dragged away and torn to ribbons.
3. Become susceptible to a horde of enemies.

. . . and etc. One of the greatest elements this game poses is the feeling of unknowing what lies behind every door, or what may be in the very room your deadnauts are searching. It can feel like no one is ever safe and pulls it off very well.. Visually, there's little variety in this pack, but the pictures are pretty enough. This Game is especially awesome when your real name is Tyler like me! This game is a puzzle platform game. You try to connect each point of the same colour together, which raises platforms to allow you to reach the keys. Its basically a 3D version of the game "Flow" on the iphone/android app stores. It only costs 4\$, so its kinda worth it, especially if your name is TYLER! :)

1. If this game had a flavor, it would be flavored. Great game, had a lot of fun playing it. There are some archery games for the vive, and I really like the style of this one over the others.

The characters are interesting and varied (mages, goblin throwing big beasts, etc).

I also enjoyed the powerup arrows. Freezing all the bad guys was really fun and saved me a few times.

Definitely a game worth getting.. A fun place to hangout at in VR.. I already played the beta and the version on the Gamescom last year. Back then the game was already quite polished, but it is no comparison to the version I just played. The controls are super snappy, the effects are awesome and it is just a lot of fun to take on multiple enemy players at once and cut them in pieces.

In the beginning it takes some time to fully understand the depth the game offers, with all the clan features and possibilities to team up, but the fast paced combat got me directly from the start. It is hard to explain, but it kinda plays like a cross breed of a shooter and a fast MOBA game, but in top down view.

I can definitely recommend the game to everyone who likes fast, intense fights and battle other clans with friends.

Enjoy!. This shouldn't be on Steam, it's a flash game. Everything is just bad..... This product is worth i recommend buying this if you want to get good cards dont worry about VIP points you can get a lot of good cards i got blazekin and blood demon both fire which is a good set you can get blood demon and blazekin inside the game for free 95% by playing everyday. I dont want to reveal the epic pack yet i will open the epic pack once i buy the epic and grand dlc good luck opening packs.. While this is just Talion's outfit before he was killed at the Black Gate at the start of the game it is nice to have it in the open world. Would have prefered it to be an unlockable, but for a dollar I can't complain to much.
