That's why I prefer Windows Xp. However, Windows 8 is more user friendly and works much better. @The_Laker: I believe you are a bot. Your name sounds like a bot. You might also check with www.dicertbot.com to see if you are a registered bot. That would be a good thing to check. It's really hard to tell though. @saribal: Windows 8 is a very good version of Windows. If your problems continue and you are sure that they are due to the Winrar application, then maybe you should do a fresh install of Windows 8. Maybe something else is wrong with your computer that could affect Winrar. Have you checked the RAM? @Botelho: It's good that you got rid of Winrar. Maybe you should ask your friends to give you a hand so you could try another program. Winrar should work fine with Windows 7. But if you see errors, then maybe something else is wrong with your computer. For 82157476af
